Training Opportunity

# Horticulture Level 3

The Wolwedans Desert Academy - a private sector not-for-gain Vocational Training provider – is based in the heart of the Namib Rand Nature Reserve in the western Hardap region.

Driven by the Wolwedans Foundation and funded by private and public doners, the Desert Academy piloted its first intake for Horticulture training during 2021 and is in the process of obtaining NQA accreditation.

We are now recruiting to enroll eager and talented trainees for the fully funded conTine pilot project:
Horticulture & Crop Production Level 3, commencing in July/ August 2023.

This training opportunity ***only*** applies to candidates who have successfully obtained a ***NTA National Vocational Certificate in Horticulture & Crop Husbandry Level 2.***
For more information (course information/ application process etc.) and the online application please go to: www.wolwedansdesertacademy.org.

The Wolwedans Foundation has made Horticulture – both training and production as well as trading – a core focus area going ahead. Food security is of paramount value and Wolwedans seeks to play an active role in producing healthy greens in the Daweb Constituency and wider Hardap region. In order to do so, capacity building and training is key.
